BOLL WEEVIL SCOURGE

PROF. MALLY SAYS COTTON WILL BE DESTROYED BY JULY 10th. UNLESS WEEVILS ARE CHECKED—SPRAYING WITH POISON THE ONLY MEANS OF SAFETY—FORMULA GIVEN.

A goodly number of farmers and business men assembled at the opera house Thursday afternoon to hear Prof. Fred W. Mally's discourse on the boll weevil question. The speaker was introduced by Mr. J. R. Astin and immediately launched into the all-important topic. He said he had been over the weevil district of the state and that the people are thoroughly aroused to make a fight and save the cotton crop. The weevil is plentiful in many localities, and even where there are comparatively few, the number will increase so rapidly, unless something is done to check them, that the cotton crop will be destroyed by July 10. I am not here for the sake of making a speech and telling you what I know about the boll weevil, but rather to tell you such things as you do not know about these pests in order that you may understand how to deal with them. I therefore hope that you will feel free to ask me any question regarding the subject that may occur to you.

I have recommended turning stock into the cotton fields and grazing off the cotton in the fall before frost for the reason that at that time of the year the weevil is at work on the top shoots or tender parts of the plant, and as these are the first parts eaten by the cattle, a very large percentage of the pests are of course destroyed in this way. The success of this plan has been tested in Lee and Milam counties to the satisfaction of the farmers who tried it. It is desirable to have the plant grazed off before frost, which is the signal for the boll weevil to hunt for winter quarters. In Milam county one farmer had three fields one of which was grazed off before frost, one after frost and the other not grazed off at all. In the first field scarcely any weevils are to be found; in the second there are a good many and in the third the pests are numerous.

I also recommended trap rows of cotton, to be planted early, before the main crop, and tests have shown this to be equally as successful as a means of getting rid of the weevil as grazing off in the fall. The reason for this is that after hibernation the boll weevils begin to scatter out early in the spring in search of cotton and as a matter of course they will attack trap rows if any have been planted. Early cotton puts on squares more rapidly than the boll weevils increase, but later on the increase of the weevils is far more rapid than of the squares. Spraying the trap rows and destroying the squares will therefore destroy most of the weevils before the main crop comes on, and saves one spraying of the main crop.

As a matter of course it is too late this year for either grazing or trap rows, but I have called to your attention examples of the successful carrying out of these earlier recommendations in order that you may have proper confidence in what I shall advise you to do now. In the first place it is proper for us to find out how the boll weevil eats the cotton. He does not puncture the squares, as is popularly supposed, but lacerates it and peels off the outside, or causes it to fall off, much as a boy would peel an apple, and then devour it. If he punctured it it would not be practical to poison. All insects are fond of sweets, and the boll weevil will eat molasses with poison in it, properly prepared, in preference to cotton. The objections to London purple and Paris green as boll weevil poison are that they are too heavy and sift down towards the bottom too much; they wash off easily in the rain and are dangerous to hands and animals; they have a tendency to scorch the cotton and cause the squares to fall off. Arsenate of lead when used with molasses and water does not add to the weight of the mixture; it does not scorch the cotton and

will not spoil taste of the molasses; it will not wash off after it gets dry for two weeks or more, and is perfectly safe for handling.

The spraying to be effective must come from both sides of the row and get in under the leaves where the weevils are found. Spraying straight down is not effective except in the case of small cotton where the weevil is at work in the heart or bud.

The knapsack sprayer will cover ten acres a day satisfactorily at this time when the cotton is small and until it is two feet high. [The Eagle learns that the knapsack sprayer can be had for \$6.50 and freight and that they will be on sale in Bryan.] The Aspinwall sprayers are better for large cotton. There are several different kinds of these to which separate attachments for the boll weevil have been made.

The one-horse four nozzle sprayer covers four rows to the round and 25 to 35 acres per day. This machine costs \$40.00 delivered at Houston. An 8 nozzle machine covering same area is adapted by special attachments to both old and young cotton and costs \$60. A machine covering ten rows to the round sells for \$100.

Some persons do not appreciate the difference between spraying and sprinkling. Spraying is finer and infinitely closer, increasing the chances of killing the weevil. It is also more economical, in the saving of the mixture. Cotton spraying also kills other insects and pests that prey upon the plant and would be profitable every year even if there were no boll weevils. One of the farmers with whom I am in correspondence informs me that he was perfectly astonished at the number and various kinds of dead insects found under his cotton after spraying. The are now probably 2000 sprayers in use in the boll weevil district and everywhere the farmers are getting splendid results.

The boll weevils migrate only in the fall and early spring. In the fall they scatter out in search of winter quarters, and in the early spring in search of cotton. Once located they remain until fall again. This habit makes it possible for individuals to kill out the weevils regardless of what their neighbors do.

Picking the boll weevils and destroying them and picking up and burning the squares are practical means that will aid materially in getting rid of them, and has been successfully tried in many localities this year. Plowing the weevil under is a mistake and does no good. Experience teaches that the pests do no like the hot sun. They hunt thick cotton and thrive in it. Plowing them under merely protects them similarly from the elements until such a time as they choose to come forth. In fact it is known that they frequently hibernate in the ground.

The formula for the spraying mixture is as follows: Take 1 ounce of arsenic and boil in one gallon of water until dissolved, 8 ounces arsenate of lead and rub up in one gallon and a half of cold water until dissolved, 1 gallon of molasses diluted with one gallon of water, mix well and add sufficient water to make 25 gallons. Double the proportion for 50 gallons. Twenty-five gallons will spray two and a half acres. The larger the cotton the greater will be the amount of the mixture required.

The cheapest molasses are as good as any for the mixture. The arsenate of lead may be had at 20 cents per pound from L. V. Elder of Galveston who receives weekly shipments from New York. The local druggists have made arrangements to supply arsenic and arsenate of lead. Aspinwall sprayers may be purchased through L. V. Elder of Galveston, and several of the Bryan merchants have placed orders for the machines with the intention of supplying their customers.

BY CONNELLY & CARNES.

Per Week, 10c. - - Per Month, 40c.

SATURDAY, JUNE 1, 1901.

It is gratifying to note that the country people of Robertson county are awakening to the necessity of increasing the efficiency of the country schools. There are now eight school districts in the county which levy a special tax to supplement the state school fund. All but two of these have been formed in the past two years. Elliott School District, No. 8, has just voted a special tax for school purposes of twenty cents on the one hundred dollars valuation of property.—Franklin Texan.

The concert given at the opera house by the ladies of the Christian church for the benefit of the parsonage fund was well attended and a musical event of more than ordinary interest and merit. The Third regiment band, Zehnal's orchestra, Prof. Collier, the trombone soloist, several of the ladies and gentlemen of Bryan who are talented in music contributed to the pleasure and success of the event. Mr. C. E. Oliver of Houston also took a highly creditable part and kindly tendered the use of his fine piano.

ATTACK THE BRITISH

Boers Raid Vladfontein and a Desperate Battle Ensues.

LOSS TO BOTH SIDES

General Delarey Led the Boers and from the British Casualties Must Have Fought Exceedingly Hard and Severe.

London, May 31.—On the anniversary of General Roberts' entry into Johannesburg the country is startled by the receipt of the news of desperate fighting and heavy British losses within 40 miles of Gold Reef City. The battle was at Vladfontein, on the Durban-Johannesburg railroad and is reported by Gen. Kitchener as the most serious engagement since General Clement's reverse at Magaliesburg. It shows that Gen. Delarey is in no way daunted by the capture of 11 of his guns by General Babington six weeks ago. The garrison

COMMANDANT DELAREY.

at Vladfontein, apparently largely composed of yeomanry, had 174 men put out of action. That their assailants came to close quarters and suffered heavily is shown by the number of dead left on the field.

A dispatch from Kroonstadt, under date of May 28, says the Boers derailed an armored train on which General William Knox was traveling. The front truck was blown with dynamite, and the Boers fired a volley into the cars. A British relief column with a Maxim gun arrived and dispersed the Boers.

Certain South African newspapers, taking their cue from Cecil Rhodes' journal, printed at Kimberly, are urging the appointment of Mr. Rhodes as premier of Cape Colony in place of Sir Gordon Sprigg.

Casualty lists issued by the war office Wednesday give 42 British killed and 101 wounded. The majority of these casualties occurred May 22 to 25, between Bethel and Standerton, in eastern Transvaal, where General Blood has been operating, and are in no way connected with the attack of Delarey.

THOMAS WILSON DEAD.

He Was a Retired Brigadier General With a Good War Record.

New York, May 31.—Brigadier General Thomas Wilson, United States army, retired, is dead. The funeral will be held at the Madison Avenue Reformed church.

General Wilson was in his 70th year. He was born in the District of Columbia. He was appointed to the military academy and was graduated in 1853. He became first lieutenant on April 1, 1857, and a captain Oct. 22, 1861. He was promoted to the rank of major on Dec. 26, 1863, and subsequently to a lieutenant colonel and colonel. On March 13, 1865 he was promoted to the rank of brigadier general for "faithful and meritorious service during the war." He held staff positions in the defenses of Washington, was a commissary of subsistence at Annapolis, and was chief of commissariat Army of the Potomac in the Richmond campaign ending with the capitulation of the Appomattox. He served on the frontier and in the war against the Seminoles and at various stations after the civil war until 1890 when he was sent to Chicago. He was retired in 1896.

Besides being a member of the Sons of the American Revolution he belonged to the Loyal Legion of the Army and Navy club.

Big Shipment of Cotton Seed Meal. Terrell, Tex., May 31.—The Terrell Oil Mill company is loading 1000 tons of cotton seed meal on Texas and Pacific trains, to be hauled to a seaport and shipped to Hamburg, Germany. Three long freight trains are required to haul the meal. The work of loading the cars has required several days.

From Chicago to Europe.

Chicago, May 31.—The Northwestern Steamship company's steamer Northtown, left here for Europe today. The vessel carries a cargo of agricultural machinery and provisions for Hamburg and oil cake and champagne for Antwerp.

Nearly All Out.

Knoxville, May 31.—Out of a total of 634 machinists on the Southern railway it is claimed 627 are on a strike.

MUST ACCEPT WHOLE

Cuban Provisions to Platt Amendment Rejected by Cabinet.

IS NOT SUBSTANTIAL

The Administration Decides the Action of the Cuban Constitutional Convention Does Not Comply With Wish of Congress.

Washington, May 31.—The president and his cabinet at a meeting today decided the action of the constitutional convention was not a "substantial" compliance with the terms of the Platt amendment. The secretary of war will convey the fact to the convention.

The administration will not consent to any modification of the Platt amendment by the Cubans. That document must be either accepted just as it passed congress or rejected outright. Obviously there is no middle ground to stand on. Even if the president and advisers were inclined to make concessions they would not have the authority to do so in this case any more than they would be authorized to change or modify any of the acts of congress.

It is probable that Governor General Wood will be advised to this effect by the president or the secretary of war. It is thought that he will also be instructed officially to inform the constitutional convention that until the Platt amendment is adopted without any qualifying or explanatory addenda and in this shape incorporated into the organic law of Cuba, the president cannot withdraw the American troops from the island, nor can the Cubans proceed with a general election of officers for the organization of their government. Doubtless when this is fully impressed on the minds of the constitution makers they will strip the amendment of the surplusage.

Mutinious Guardsmen.

Brussels, May 31.—An extraordinary scene occurred in Antwerp when mutinious civic guardsmen paraded the streets singing "Marseillaise." Police had to be called to protect the officers from revolting troops. There has been friction for some time. While drilling Thursday a guardsman in ranks lighted his pipe and when reprimanded for doing so insulted the officer who administered reprimand. The guardsman was arrested, whereupon his comrades broke ranks, hooted at their officers and proceeded to demolish the property on the parade ground with the butt end of their rifles. Subsequently they paraded the streets singing.

South American News.

San Francisco, May 31.—The City of Sydney has just arrived here from Panama and other Central American ports bringing the following news:

When the City of Sydney was at Corinto the people were expecting an invasion from the Colombo government of Nicaragua and in order to make sure it would not be caught napping, stationed 500 men at Corinto.

The Pacific Mail Steamship company's coal barge, situated on Naos island in Panama bay, recently suffered severely from fire, the flames burned for 15 days.

Three Trolley Cars Run Away.

Wilmington, Del., May 31.—Three heavily loaded trolley cars on the New People's Street railway ran away while going down a steep hill in this city killing one man, fatally injured another and hurting 25 others more or less seriously. Joseph Hughes who jumped from a window of a car in which he was riding fell beneath the wheels and his body was cut in two. Each car carried nearly 100 passengers returning to the city from Brandywine Park.

Thirty Years for Wife Murder.

Knoxville, May 31.—James Birchfield, who killed his wife at Rogersville two years ago, was sentenced to 30 years in the penitentiary. He was sentenced to hang last year, but the supreme court reversed the case. Birchfield is a noted criminal, having served 21 year in penitentiaries of Tennessee, Kentucky and Virginia.

Will Test Texas Oil.

Cleburne, Tex., May 31.—The Santa Fe road has designated engine No. 065 as a test engine for the Beaumont crude oil. This engine is now in the Santa Fe shops here, being fitted out with tanks and burner. When completed this will be the first engine on the system to burn Texas oil.

Carried Out Her Threat.

Terre Haute, Ind., May 31.—"If I go home I will go in a box," said Josie Emerson, aged 15, when Mrs. Murray, for whom she worked, told her that owing to her waywardness she must return to her parents in Danville, Ills. Miss Emerson then walked into a bedroom and shot herself dead.

Silvester Elected President.

New York, May 31.—Major Richard Silvester of Washington, D. C., was elected president of the National Association of Police Chiefs. Deputy Police Commissioner William Devery of New York was elected vice president.

Hanged for Assault.

Baltimore, May 31.—Wiley Kirk, a negro, 18 years old, was hanged at Towson for criminal assault on a white woman.

Ex-Confederates Admitted.

St. Paul, May 31.—The National Association of Military Surgeons has decided to admit ex-Confederates to membership.

Study the Routes!

Before deciding how you will go to San Francisco for

THE EPWORTH LEAGUE GENERAL CONFERENCE

learn just what inducements the various lines offer. There is no difference in the price. However, the service, equipment, schedules (time on the road costs money) and territories of the various companies admit of some preference.

If you enjoy comfort and satisfaction, use the handsomest trains—having Pullman Palace and Observation Sleepers, with the only dining-car service from Texas, take the only road operating regular through trains to Colorado points, the one which gives you choice of SIX different routes beyond Colorado with full stop-over privileges at Salt Lake City, among the Rocky Mountains, etc.

THE WHEAT HARVEST

Activity in the Work Begun in the Panhandle District.

YIELD IS A SURPRISE

Though the Millers Place the Shortage at Fifty Per Cent, the Production So Far as Reported Is Quite Satisfactory.

Fort Worth, Tex., May 31.—The executive committee of the State Millers' association in session here discussed the wheat outlook. It was the consensus of opinion that the crop in Texas would be damaged fully 50 per cent, the injury being confined to the Panhandle and north Texas district, the crop in central Texas being in splendid shape with the prospect for the best yield in years past.

Yield Satisfactory.

Rhame, Tex., May 31.—Harvesting has been inaugurated throughout the entire community. Binders are seen going in all directions and pulling into large fields. It is thought that by the last of this week harvest will be fully on. The farmers are experiencing some difficulty in securing the requisite number of laborers to assist them in the harvest. They are offering good wages for such labor. A great many are surprised to find the wheat so heavy after it is cut. It has an extra heavy head, well filled and will make a better sample than last year's crop. It is estimated that the wheat through this belt will average 18 bushels per acre.

Rain and Hail Storm.

Waco, Tex., May 31.—A rain and hail storm, accompanied by a high wind, occurred Thursday over a belt about two miles wide and six or eight miles long. The hail beat down corn and thrashed the young fruit from the trees. The extent of the damage in that respect cannot now be estimated. The rain beat into mercantile establishments and caused damage to goods, amounting to several thousand dollars. The streets were flooded and water poured into several basements, causing further loss. In East Waco the residence of W. P. Pipkin was unroofed and one wall fell down. No one was hurt.

Hunting for Farm Hands.

Weatherford, Tex., May 31.—Rain fell here Thursday, enough to stop the wheat harvest for a few days. L. W. Woodhouse of Bear creek said he had commenced cutting his wheat and he thought it would average about seven or eight bushels to the acre. He was in after hands to help in the harvest. Several farmers have been in this week hunting hands, which they find very scarce.

Panhandle Wheat Harvest.

Wichita Falls, May 31.—The wheat harvest is on hand here. All of the farmers seen report the wheat better than expected. There is a great scarcity of labor for the harvest field. Many farmers are leaving their wheat unshocked for this reason.

Was Sawing the Bars.

Waxahachie, Tex., May 31.—An attempt to break jail was discovered here Wednesday evening. Hearing a grating noise in the cellroom Jailer Thomas Jennings cautiously slipped up and found a prisoner named Gibbons, recently brought here from Corsicana on a charge of burglary, sawing one of the iron window bars with a saw made from an old pair of scissors. A thorough search of the prisoner and his cell revealed two old knife blades and a steel shoe spring hidden away.

THE CONDITION OF THE PATIENT

Is often such that the slightest variation from what the doctor prescribes may have serious results. Prescriptions compounded here are absolutely correct. The order is followed exactly. We add nothing, hold out nothing and substitute nothing. The purest drugs and medicines are used. Everything is fresh and efficient.

M. H. JAMES,

THE LEADING DRUGGIST.

Women Who Work

Nine out of ten women are afflicted with some of the common ailments known as female diseases. Among women whose employment requires them to stand on their feet or sit in the same position all day, not one in twenty-five escape these troubles. The average feminine constitution cannot, unaided, withstand the strain to which steady, trying work subjects them. The organs of womanhood are so delicate and finely adjusted that the inevitable result of constant standing, lifting, stooping or straining is displacement of vital parts. The disorder is usually slight at first, but soon develops into irregular or painful menstruation, leucorrhoea or falling of the womb. Wine of Cardui is the right remedy for female weakness. As such it is offered to you. Wine of Cardui will not perform miracles, but it will, if taken as directed, insure painless and regular operation of the menstrual function. It will drive out every trace of leucorrhoea, and will so strengthen the ligaments that falling of the womb will be an impossibility. Don't you think it would pay you to try a medicine with such a record as that? You can get a \$1 bottle of Wine of Cardui at any drug store and use it in the privacy of your home.

WINE OF CARDUI

Townsend, Ga., May 18, 1899.
I have been in bad health with falling of the womb, weak back, nervousness and heart palpitation. At monthly periods I would be in bed suffering great pain. Lately I have been taking Wine of Cardui and Theodor's Black-Draught, and they have brought me wonderful relief. I have no pain, and do not stop work at the monthly period.

Mrs. LUCY SMITH.

F. A. LEE.

SEVEN LIVES LOST.

Five Girls and Two Boys Swept Over a Dam and Drowned.

Philadelphia, May 31.—A rowboat containing a merry party of eight young persons was swept over Flat Rock dam in the Schuylkill river late Thursday afternoon and seven of them drowned, five girls and two boys. The victims were all orphans.

The party started out for a picnic early Thursday morning and pitched their camp at Rose Glen, along the Schuylkill river. The party separated after dinner for a row on the river. Heavy rains during the past week had made the muddy stream quite high and the current was much swifter than usual.

The boy doing the rowing decided to go through the locks, and as he approached the dam he was hailed by the lock-keeper not to approach any closer. The young oarsman attempted to turn the boat, which was then about 50 feet from the dam, but he turned the wrong

The head and tail

of the matter is simply this—beef cut from animals over three years old is tough, lacks flavor, and is deficient in nourishing juices. We prefer to sell flesh of YOUNG STOCK. It is delicious, tender, rich and nourishing. Much cheaper, though costing a little more money than cuts from old animals. No better meat than that sold at

Two Markets—One in new market building near courthouse and one next door to The Bryan Grocery Company

way. Realizing then, for the first time that they were in danger, the girls began screaming and the oarsman lost control of the boat. Swiftly it was brought to the brink of the falling waters and just as it reached the breast of the dam over which 30 inches of water was passing the entire eight stood up and the boat went over stern first.

The drop to the rocks below was approximately 12 feet. The boat struck the water bottom up and as it dropped the whole party was caught under it. Nothing more was seen by the few persons who saw the accident, for almost a minute when it reappeared with one boy clinging to its keel. Then one young man was seen to come to the surface and made a futile effort to reach shore by swimming. The five girls and one boy never rose to the surface. The boy clinging to the boat floated fully a mile down the river and his rescuers had an exciting time before they landed him in another boat.

Brother Kills Brother.

Memphis, May 31.—William Wooten was shot to death by his brother, Jesse P. Wooten, here Thursday. The death of William Wooten closed a duel with pistols at close range. Jesse Wooten received two wounds, one in the right shoulder just below the collarbone and the other on the top of the head. He is not seriously injured. Jesse Wooten fired five shots at his brother and every one of them took effect about the head and body. When he had emptied his pistol his brother lay almost at his feet breathing his last. Jesse made no effort to escape. The tragedy grew out of some family troubles, the exact nature of which is not known.

May Be Renewal of a Feud.

Nacogdoches, Tex., May 31.—A killing is reported from San Augustine by telephone. Pleas Wall was shot and instantly killed in the road five miles east of there. One shot went through his neck, another through his body and a third hit the horn of his saddle. He was shot with two guns from the side. He was on horseback driving some cattle. A negro and a white man were riding ahead of the cattle. The negro says he heard the shooting, but saw no one shoot. He saw Wall fall from his horse. Wall's pistol was found in his pocket with handle downward and two chambers empty. Interest is high here, as it is regarded as a renewal of a feud.
